IRIS

The faces you forget.
Remembered for you.

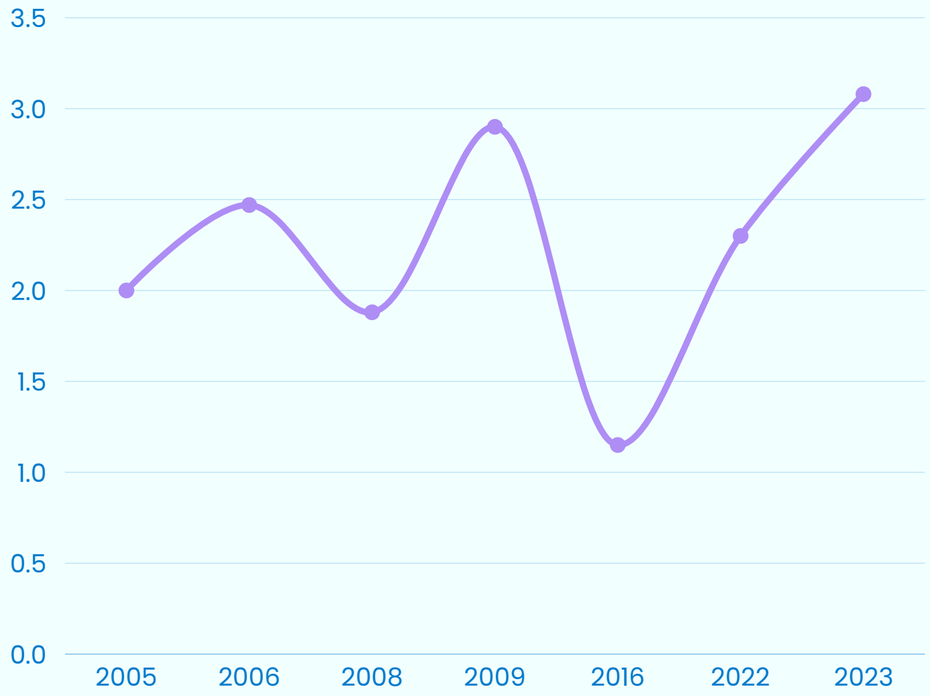
The problem

Prosopagnosia

1 in 33 people affected.

Social isolation. Daily.

No cure. No awareness.



Our solution

Face Recognition

Identifies familiar faces in real time using the camera

Smart Alerts

Notifies the user by voice or phone notification instantly

Wearable Device

IRIS is compact and discrete to wear daily

Mobile App

Connected app manages contacts and settings

Future ideas

Ecosystem Expansion

Broader integration with phones, smart home devices, and assistive tech.

Enhanced AI Model

More accurate, faster face recognition with fewer false positives.

Real-World User Testing

Validated through trials with diagnosed prosopagnosia patients.

Robust Wearable Design

Compact, comfortable hardware built for all-day everyday use.

Impact

Faces. Recognized.

Confidence restored.

240M people reached.

Independence. Daily.
